Number of Male Employees	3.0%	9.6%	25.9%	50.0%
Number of Female Employees	135	135	135	134

Commentary

We believe that our employees are our most valued asset and we are consciously working towards closing the gap and creating a more balanced environment. As an industry, we naturally attract more males to our Company than females simply due to the nature of the work. However, since 2021 we have seen a positive sway to females within supervisory and management roles, whether this has been through internal promotion or external recruits and we continue to increase this in 2024.

At the snapshot date, we had 539 employees; 420 were males and 119 were females. The mean (average) pay gap is 25%, which previously was 23% in 2023 and 24% in 2024.

Within the business, females in a comparative role with similar responsibilities receive the same level of pay. The report gap is considered misleading as it is not a pay issue, but one that is inherent from roles that are populated by males, who hold senior positions and the structure of bonus related pay.

We are committed to improving the gender split and equal pay across the Company which can be seen each year with more females coming in to traditionally male occupied roles.

Declaration

As a Director of Ernest Doe & Sons Ltd, I confirm that above information is accurate and reports a true picture of the Gender Pay Gap within our organisation as at April 2024.

Signed.....
Angus E. Doe
